## ***Sculptures by Anna-Maija Reés***

■ The collection of work by Finnish sculptor, Anna-Maija Reés, can be seen in the Folk Museum in Mijas Pueblo until 16th February. Many of her creations represent female forms and Anna Maija claims to have been influenced both by her profession as an architect and by the different European countries she has worked in. While her work is basically made of clay it incorporates a wide range of other materials which provide original diversity. Some examples of her work can be seen above.
